Temperament dairy cattle webinar

14 October 2021

Danish/Swedish time 9.00 - 11.00

Finnish time 10.00 - 12.00

Background for the webinar

Focus from practice on:

- Amount of temperament registration

- Definition of temperament

- How can we best and most efficient record temperament in the future?

The aim will the webinar is to discuss and recommend actions in relation to:

- Amount of future temperament registrations for breeding purposes

- Possibilities for improving the current temperament registration

- Possibilities to get more temperament registrations by modified registration paths

- Possibilities to register different temperament measurements in the future
