Genetic traits

- Traits that are inherited by a single gene or haplotype
- Traits are not affected by the environment
- Desirable (e.g. polledness) and undesirable (e.g. ataxia)
- Genetic traits are derived from SNP results based on a genomic test or from a laboratory test
- **Results shown in NAV Beef Search and in this presentation are only from genomic test**
- F = Free, C = Carrier, (S = Double carrier)

Genetic traits - Beef

- Results updated to beef search at the same time with indices
 - March, April, June, November
- More genetic traits will come to beef search
 - Results of the following traits are most likely available in the near future:
 - AAN – Curly calf
 - AAN – Contractural arachnodactyl (Fawn calf syndrome)
 - CHA – AED (Anhidrotic Ectodermal Dysplasia)
 - HLA – Crop ear
 - LIM – Cleft palate
