

NTM revision 2028 Current status

Haifa Splittorff

NAV NTM Revision Webinar: Future Production
Circumstances and Trends

21 April 2026

NAV

   Nordisk Avlsværdisvurdering • Nordic Cattle Genetic Evaluation

1

NTM – The common Nordic breeding goal

“
NTM is a pride of the Nordic collaboration
Tailor-made for Nordic production circumstances

*It is where Nordic collaboration is at its best
shared ambition, shared trust, and better decisions together.*

2

NTM history and revision path

NTM evolves through major revisions — with a broad process before each implementation.

Balanced breeding goal

The current revision follows the same overall logic: broad input first, align on future production circumstances then technical and economic work, and finally decision and implementation.

3

CURRENT STATUS

NTM revision 2028

We are now building the shared foundation for the next version of NTM.

What this phase is about

- 1 Listen
collect Nordic input
- 2 Align
build a common direction
- 3 Prepare
Prepare the foundation for NTM 2028

Revision journey

2025 Plan approved

Today 2026 Input & discussion

2027 Calculations & Fine-tuning

2028 Decision & launch

CURRENT STATUS

Where we are in the process

The revision is already underway. Today first NAV NTM webinar on future production circumstances.

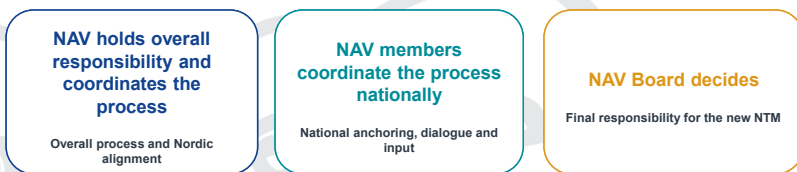

All input from national dialogue, stakeholder interviews and today's discussion will feed into the first common draft.

5

A shared process for a shared Nordic breeding goal

This revision depends on strong collaboration
The broader the involvement, the stronger the NTM.
